

PONDEROSA FALLS RV RESORT

Nestled among beautiful pines in the foothills of Eastern Washington

Ponderosa Falls RV Resort is just a 10-minute drive from Spokane, but with forested grounds and more activities than you can throw a pine cone at, it's the outdoor adventure your family is craving. It's easy to unhitch the car and take an excursion into Spokane, but there are many reasons why you won't even want to leave the resort.

It's what's at Ponderosa Falls Resort that sets it apart from other campgrounds near Spokane. For your pleasure, there's an indoor pool, spa, workout room, themed mini-golf, and planned activities for the whole family. Your youngsters will enjoy the kiddies' lagoon. Meet new friends at the sport court or while picking up a game of sand volleyball. Relax around the community fire pit.

In addition to spacious full hook-up campsites, enjoy 30- to 50-amp electric and Wi-Fi. If you traveled without your rig, check into one of five bungalows and seven cabins.

Downtown Cheney is the region's gateway to the Columbia Plateau Trail and the Fish Lake Trail, both of which explore the unique geology of the Great Ice Age Floods.

If you must go offsite, head to nearby Spokane where you'll find the best shopping on the sunny side of Washington State. For a thrilling view of the area, take the gondola skyride above the raging Spokane River.

For hiking or biking, check out the Centennial Trail, which is a 31.3-mile point-to-point trail located near Spokane. It features a lake and is accessible for all skill levels. The trail offers a number of activity options and is open year-round. Dogs are also able to use this trail but must be kept on leash.

For a different kind of adventure, visit the John A. Finch Arboretum located in southwest Spokane on 65 acres of wooded hills. The collection has been planted along the Garden Springs Creek and contains a wide variety of native and cultivated plant materials.
